**DID YOU KNOW?**

For decades, the application of microcurrent frequencies in animals (eg, horses, dogs, and cats) has been used.

It is a proven method with a long history of successful applications in animals, supported by experts and professionals in the fields of veterinary medicine and animal physiotherapy.

# Support the optimal well-being of your pet with microcurrent frequencies

Since your pet's happiness and health are your number one priority, take steps to improve their holistic well-being.

Although they are impossible to see, bioenergetic imbalances can silently affect the well-being of your pet. It is essential to act before these imbalances worsen and cause discomfort.

## The effects of microcurrent on animal welfare

according to an animal study by Ngok Cheng et al.<sup>2</sup>

**increase in transport amino acids**

Amino acids are the building blocks that make up proteins during the process of protein synthesis.

**increase in protein synthesis**

Protein synthesis is the process by which proteins are formed and physical life is created from the DNA backbone of each cell.

**increase in production of ATP**

ATP (adenosine triphosphate) stores energy in cells in a similar way to gasoline in a car tank. It is produced by the mitochondria, the powerhouses of the cell.

The numbers speak for themselves

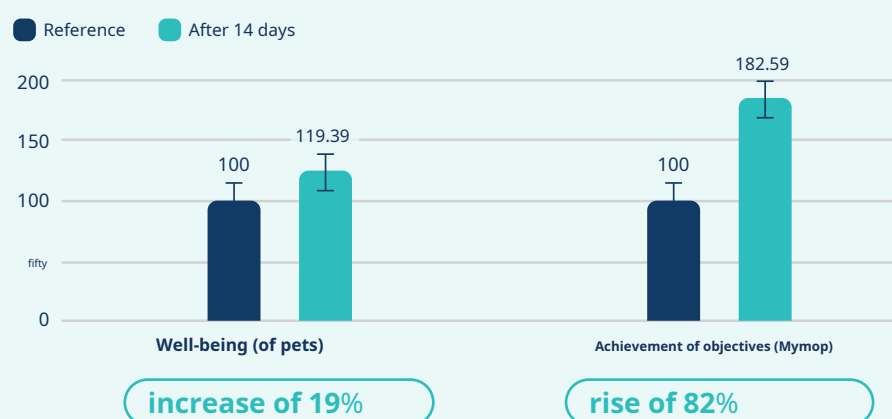

## The Healy Animal Study

In a HealAdvisor Animal Module study, participants (animal owners) evaluated their pet's well-being before and after the implementation of animal programs. After just two weeks, there was an increase in well-being of 19%.

Pet owners reported improvements in various aspects, including hormonal issues, eating behavior, mobility, aggression, and much more. After two weeks of the IMF application, conditions had improved an average of 82%.

The study showed a large effect in increasing well-being and even a very large effect in achieving individual goals.

Frequencies for Your Life

- <sup>1</sup> "Individualized Microcurrent Frequencies" ("IMF") is a Healy World proprietary technology. It uses data from a physical noise generator to assign a priority to the frequencies that, based on professional experience, are most important to the user. The duration, frequencies, intensity, frequency, name and descriptions of the Individualized Microcurrent Frequency (IMF) programs are based on the practical experience of Nuno Nina and other experts and our knowledge of the interaction of FM microcurrent with the Field. Biogeneretic. They have not been confirmed by independent studies. Healy's Individualized Microcurrent Frequency (IMF) programs are programs designed to promote well-being through the harmonization of the Bioenergetic Field. We have conducted blinded before and after studies in randomized controlled groups of participants, which suggest that the well-being of the participants increased after the application. We attribute this fact to the harmonization of the Bioenergetic Field, which we refer to as the flow of vital energy and which is also traditionally known as Chi (or Qi) and Praná. This fact has not been confirmed by independent studies.
- <sup>2</sup> Cheng, N., et al. (1982). The effects of electric currents on ATP generation, protein synthesis, and membrane transport in rat skin. Clinical orthopedics and related research, 171, 264-72. This in vitro study refers to the effects of microcurrent and the basic mechanisms on which Healy frequency programs are based. It did not include any Healy devices.
- <sup>3</sup> The content reproduced by the HealAdvisor App does not constitute a medical diagnosis or veterinary advice, in case it is used with pets or other animals. Such advice can only be provided by a healthcare or veterinary professional. Healy Individualized Microcurrent Frequency programs are only intended to harmonize the bioenergetic field. If your animal has or thinks it has a disease, or is under the care of a veterinarian, you should talk to the vet before following these recommendations. All personal data you upload to the HealAdvisor Cloud is encrypted to protect your privacy.
- <sup>4</sup> Information Field technology is Healy World proprietary technology. It is based on the theory that the Information Field is a non-material zone through which spirit and matter communicate. It reflects what we consider to be the spiritual meaning of life experiences. The existence of such a field is discussed in the scientific literature. The analysis in the Information Field is designed to look for information patterns that contribute to the harmonization of the Information Field. For this purpose, contents such as descriptive phrases, arranged in lists, are assigned a priority by evaluating data from a physical noise generator. Based on the experience of our users, this priority reflects relevance to the user. An Information Field analysis reflects a combination of factors at the time the analysis is performed, including user intent. A scan at a different time may have a different result due to changes in environment variables. The content of the databases and modules of the HealAdvisor Analyze app is based on the practical experience of the experts who created them. We have conducted blinded before and after studies in randomized controlled groups of participants, which suggest that the well-being of the participants increased after the application. We attribute this to the harmonization of the Information Field, which we consider to be the unified background field of the material and mental dimensions. They have not been confirmed by independent studies.

**Warning:**

The Healy device's Individualized Microcurrent Frequency (IMF) programs are not medical applications.
